# MODULAR OUTDOOR KITCHEN

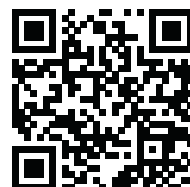

*for lifetime*

VIDEO 1

VIDEO 2

VIDEO 3

*weather **RESISTANT**  
material*

Only 304 stainless steel was used except for the countertop, which is made of artificial stone.

We have 3 basic elements that we can use independently or connect them according to our wishes. If we want an angular layout a corner element is added. Each item is packaged in its own cardboard packaging, which means smaller logistics costs.

*modular*

**artificial stone  
(porcelain)**  
with 15mm  
thickness  
decor Italian marble

Work surface resistant to  
external influences, easy  
to cleaning.

*sink and faucet  
for outdoor use*

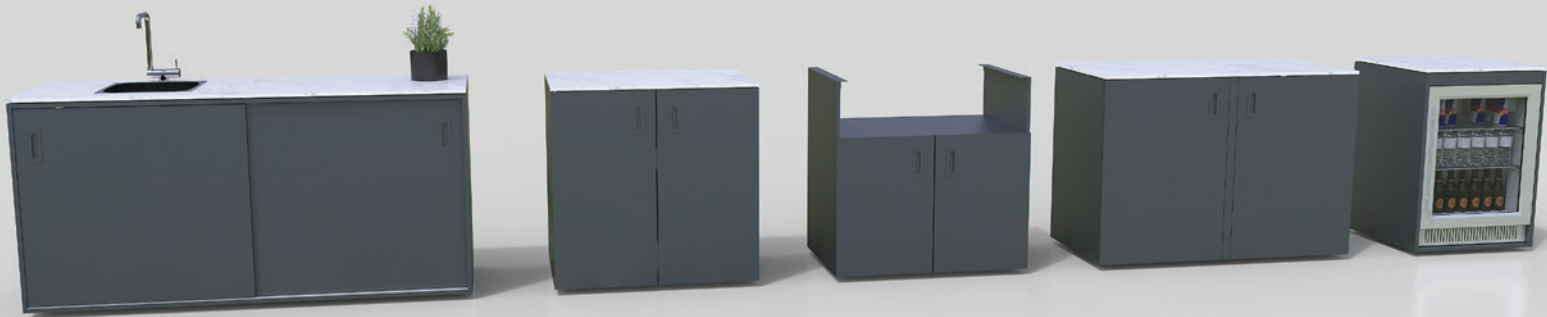

Sink and faucet are made of stainless steel. The armature also has switching function so that we can lay it down.
